SUMMARY

Junior Backend Engineer with 1.5 years of professional experience developing and maintaining IoT data platforms and REST APIs using Java and Spring Boot. Strong interest in AWS cloud infrastructure, database optimization, and scalable backend systems. Experienced in integrating and processing large volumes of weather and sensor data while ensuring system reliability and performance. Passionate about building robust software solutions, understanding full-stack product lifecycles, and continuously expanding technical expertise in modern cloud environments.

EXPERIENCE

Backend Developer | Nov 2024 – Jun 2026

Youngilee – Jeju City, Jeju Special Self-Governing Province, KOREA

- Maintained and enhanced production backend services built with Java and Spring Boot, supporting internal platforms and customer-facing web applications.
- Designed and implemented REST APIs for external clients, including API key authentication and IoT data integration.
- Built and operated automated weather data collection pipelines using Python, integrating nationwide meteorological and environmental datasets.
- Improved system reliability by diagnosing production issues, resolving memory bottlenecks, and optimizing database performance.
- Redesigned RTU data processing architecture from a monolithic workflow into a scalable pipeline using Node.js, Java Batch, MQTT, and MySQL.
- Participated in cloud infrastructure operations on AWS, including EC2 and RDS environments, and contributed to MySQL version upgrades and database modernization.
- Refactored legacy Spring Boot applications into a layered architecture with DTOs, service layers, and REST APIs to improve maintainability and scalability.
- Collaborated with government agencies, research institutes, and external stakeholders to gather requirements and deliver technical solutions.

Software Developer | Jun 2024 – Oct 2024

Globit – Jeju City, Jeju Special Self-Governing Province, KOREA

Government & Public Sector Projects

- Maintained and enhanced a legacy Java-based platform for the Gyeongsangnam-do Fisheries Resources Research Institute, ensuring system stability and operational continuity.
- Participated in the design and development of user interfaces for a government-funded musculoskeletal healthcare project commissioned by the Busan Metropolitan City.
- Performed server administration, system maintenance, and operational support across multiple web-based platforms.

- Contributed to government-funded ODA (Official Development Assistance) projects, supporting proposal preparation, technical documentation, and project planning activities.
- Participated in project kick-off meetings and stakeholder discussions for an aquaculture logbook platform, representing the development team in meetings with Jeju Technopark and external partners.

Collaborated with public-sector stakeholders to gather requirements, discuss technical feasibility, and align platform development with business objectives.

EDUCATION

BUFS(Busan University of Foreign Studies) – Busan, SOUTH KOREA | Bachelor of Arts (B.A.) in German Language and Literature | Mar 2017 – Feb 2024

Bachelor's Degree in German Language

BUFS(Busan University of Foreign Studies) – Busan, SOUTH KOREA | Bachelor of Engineering (B.Eng.) in Computer Software | Mar 2017 – Feb 2024

Database System
Internet of Things
Programming with C, Java, and Python
Software Engineering Fundamentals
Capstone Design Project
Ideathon & Innovation Program Participation

SKILLS

- Spring Legacy Framework
- Spring Boot
- Python
- React TS
- JPA
- Mybatis
- MySQL
- EC2
- RDS
- Github Actions
- Ubuntu
- React TS (tailwind)
- HTML

LANGUAGE

- KOREAN (NATIVE)
- ENGLISH (OPIc AL)

- DEUTSCH (A1-A2)
- CHINESE (NOVICE)
